

GREENTECH INTEGRATED SOLUTIONS LTD

Building a smarter, safer & more sustainable future

A Nigerian private company building technology-enabled services across secure mobility, digital engineering, energy & resources, and agri & food systems.

OUR BUSINESS STREAMS

Secure Mobility

Premium, accountable and specialist chauffeur-driven travel.

GIS DIGITAL ENGINEERING

BIM, data, information management and asset intelligence.

GIS ENERGY & RESOURCES

Energy, infrastructure and industrial solutions.

GIS AGRI & FOOD SYSTEMS

Agriculture, processing, supply chain and markets.

VERIFIED CORPORATE SNAPSHOT RC 9023114 | Incorporated 25 Nov 2025 | Private Company Limited by Shares | Status: Active

CAC principal business activity: Construction Consulting, Vehicle Rental Services, etc.

RideSafe - Secure Mobility

A premium chauffeur-driven mobility platform with accountable operations and specialist service controls.

FLAGSHIP CONSUMER BRAND

SECURE MOBILITY. DELIVERED WITH CARE.

Professional chauffeur. Verified journey.
Calm, discreet support.

Nigeria-wide availability is confirmed by route,
city, ride class and operational capability.

THE RIDESAFE COLLECTION

01 Premium Ride

Chauffeur-driven premium SUV for airport, private-day and interstate journeys.

02 Luxury Ride

High-comfort hospitality and event transport, including premium group configurations.

03 Executive Ride

Quiet professional travel for meetings, roadshows, airport transfers and senior guests.

04 Working Ride

Site-ready mobility for project teams, PPE and securely carried light equipment.

05 Medical Ride

Planned transfer or standby delivered only through verified clinical capability.

06 Armoured Ride

Pre-arranged protected mobility subject to risk review, certification and lawful partner controls.

No self-drive

Operations-led
confirmation

Live trip visibility & SOS

Itemised server-side
pricing

Verified vehicles &
personnel

RideSafe GT - Class 39 trademark application acknowledged 24 July 2026 (File NG/TM/O/2026/457555).

GIS Digital Engineering

Digital engineering, information management and data-led delivery for the built environment and infrastructure sectors.

ENGINEERING THE DIGITAL BUILT ENVIRONMENT

From information requirements and coordinated models to structured asset data, digital workflows and operational handover.

CORE CAPABILITIES

01

Information Management

ISO 19650-aligned requirements, standards, delivery planning, governance and assurance.

02

BIM & Coordination

Revit workflows, model federation, issue management, QA and multidisciplinary coordination.

03

Asset Information

COBie, classification, validation, PIM-to-AIM handover and asset-information readiness.

04

Digital Twins & Visualisation

Data-rich 3D/4D environments, dashboards and decision-support visualisation.

05

CDE & Digital Workflows

CDE setup, permissions, naming, status, transmittal, review and controlled information exchange.

06

Data, Automation & Platforms

Reporting, workflow automation, software/platform governance and technical support.

DELIVERY APPROACH

Define -> Govern -> Coordinate -> Validate -> Handover

Practical capability is informed by ongoing digital-platform governance and engineering-delivery experience, including system administration, user access, workflow control and technical support.

GIS Energy & Resources

A partnership-led platform for energy, infrastructure and industrial services across Nigeria and wider African markets.

**GIS ENERGY
& RESOURCES**

ENERGISING PROGRESS. POWERING COMMUNITIES.

Selective, asset-light entry through credible partners, defined project scopes and disciplined delivery.

OUR OFFERING

01 Oil & Gas Support Services

Project support, vendor coordination, technical logistics, shutdown/maintenance support and defined field-service scopes.

02 Energy Infrastructure

Support for power, utilities, facilities, pipelines and energy-related infrastructure delivery.

03 Industrial Services

Procurement, maintenance support, facilities coordination and specialist industrial partnerships.

04 Future Energy

Renewables, hybrid-power and lower-carbon opportunities pursued where technically and commercially justified.

05 Project & Supply Chain

Structured procurement, supplier due diligence, logistics coordination, documentation and delivery assurance.

06 Digital Integration

Apply GIS digital-engineering capability to improve asset information, reporting, maintenance data and project controls.

Initial commercial model: project-led and partnership-led, with major capital deployment only after validated demand, capability and risk review.

GIS Agri & Food Systems

A sustainable agribusiness platform designed around the full food value chain - from production to processing, logistics and markets.

GROWING FOOD. NOURISHING NATIONS.

Build scalable value across production, technology, processing, storage, supply chain and market access.

VALUE-CHAIN OPPORTUNITIES

01 Crop & Primary Production

Crop production, controlled growing, aquaculture/livestock opportunities and contract-farming models where viable.

02 Agri-Tech & Productivity

Farm data, irrigation, mechanisation, traceability, input optimisation and practical productivity tools.

03 Processing & Value Addition

Sorting, processing, packaging, quality systems and branded/value-added food products.

04 Storage & Cold Chain

Post-harvest handling, warehousing, temperature-controlled storage and loss-reduction systems.

05 Logistics & Distribution

Transport coordination, route-to-market partnerships, institutional supply and regional distribution networks.

06 Markets & Trade

Domestic buyers, commodity channels, institutional procurement and future export pathways subject to compliance.

Focus: food security, sustainable production, quality and traceability, stronger value chains and commercially viable partnerships.

Company Information, Leadership & D-U-N-S Support Data

Corporate facts below are aligned to the supplied CAC and tax documents, with current company-domain contacts added for verification.

VERIFIED COMPANY INFORMATION
